## EDUCATION

---

### 2022 – 2024 - Master of Science in Engineering.

Télécom Paris, Polytechnic Institute of Paris, Palaiseau, France. *Double degree programme.*

- Grade: 3.9 out of 4.0 GPA (Expected).
- M1: Embedded systems, mobile networks, and the internet of things.
- M2: Embedded systems and information processing.
- Research project: Modelling critical real-time execution for 5G base stations.
- Relevant Modules: *Reconfigurable architectures and HDL languages (FPGA, SystemVerilog, and VHDL), Rust, Concurrent programming, Microprocessor-based systems, IoT Protocols and Systems, Wireless IoT, Mobile networks and virtualisation, Embedded Linux, Embedded AI, Real-time Systems, Language Processing.*

### 2017 – 2024 - Bachelor of Science in Electrical Engineering.

Federal University of Espírito Santo, Vitória, Brazil. *Double degree programme.*

- Grade: 8.0 out of 10.0 (Expected).
- Control and automation systems, telecommunications, and computer science.
- Final Project: Multiplatform System For Data Reception Via Visible Light Communication Technology.
- Relevant Modules: *Embedded Systems, Computer Architecture, Digital Systems, Computer Networks, Telecommunications Systems, Dynamical Systems, Mobile Robotics, Computer vision, Oriented IoT Project.*

## PROFESSIONAL EXPERIENCE

---

### 2024 - Embedded Systems and IoT Intern.

Orange S.A., Meylan, France.

- Development of an application for remote access to Matter devices.
- Embedded software for an IoT gateway based on ARM Cortex-A processor.

### 2023 - Network and Automation Intern.

Synchrotron SOLEIL, Saint-Aubin, France.

- Software tool parameterisation dedicated to centralised supervision of Siemens PLCs (S7-3xx and S7-15xx).
- Coverage of over 98 % of the targeted devices, through a solution based on the S7 and SNMP protocols.
  - Real-time monitoring tool: Zabbix;
  - Programming languages: Python, C/C++, and CMake.

### 2021 – 2022 - Embedded Systems and IoT R&D intern.

2Solve Engineering and Technology, Vitória, Brazil.

- Development of software for embedded systems, IoT Web Applications, and technical documentation.
  - Embedded systems based on Raspberry Pi and SAMD21.
  - Programming languages: Javascript, Python, C/C++, and CMake.
  - Dev tools: NodeJS, AngularJS, InfluxDB, and MongoDB.
  - IoT tools: Node-RED and Grafana.
- Research project:
  - Design of an OOK transmitter for short-link visible light data communication.

### 2019 – 2021 - Scientific and Technological Undergraduate Researcher.

UFES Telecommunications Laboratory (LabTel), Vitória, Brazil.

- Software and hardware design for visible light communication systems (VLC systems).
  - Dev tools: Android Studio, NodeJS, VueJS.
  - Programming languages: MatLab, Java, Python, and C++.
- Research projects:
  - Application of Visible Light Communication Technology in Monitoring High-Risk Newborns;
  - SmaL: Smartphone Receiver for Coded Data via Light.
  - Publications: [1], and [2].

### 2019 – 2020 - Automation Intern.

Cassiano Antonio Moraes University Hospital (HUCAM), Vitória, Brazil.

- Establishment of electronics for a supervisory system, data monitoring app, and creating technical documentation.
  - Embedded systems based on Raspberry Pi, Arduino, and ESP8266.

- Real-time monitoring tool: Zabbix.
- Programming languages: Python, Javascript, and C++.
- Publications: [4]

## 2019 - Scholar in educational programme.

Tutorial Teaching Program (PET), Vitória, Brazil.

- Software training, such as LaTeX. Research about embedded systems. Production of scientific articles.
  - Embedded systems based on Raspberry Pi and Arduino;
  - Programming languages: MatLab, Python and C/C++.
  - Publications: [3]

## PUBLICATIONS AND APPEARANCES

---

1. ZWAAG, K., ROCHA, H., SEGATTO, M., BASTOS, T., SILVA, J., SANTOS, F., **SANTOS, A.** et al., 2021. **Performance Evaluation of an OOK-Based Visible Light Communication System for Transmission of Patient Monitoring Data.** IFMBE Proceedings.
2. **SANTOS, A.**, ROCHA, H., SEGATTO, M., BASTOS, T., SILVA, J., ZWAAG, K. et al., 2020. **Application of Visible Light Communication Technology for Monitoring in Hospitals.** Brazilian Congress on Biomedical Engineering.
3. **SANTOS, A.**, JURESWKI, A., MENDONÇA, M., ULHOA, P., 2020. **History of PET Electrical Engineering UFES.** Brazilian Congress of Engineering Education.
4. **SANTOS, A.**, JUNIOR, L., JARDIM, I., 2020. **Low-Cost Module for Supervisory System of Hospital Substations.** In: Congresso Internacional Online das Engenharias.

## VOLUNTEERING

---

### 2018 – 2019 - Activity Manager.

Academic Center of UFES Electrical Engineering, Vitória, Brazil.

- Organization of welcome events for freshmen, organization of lectures on subjects of interest to graduation, promotion of sports events, electrical engineering custom t-shirts selling, maintenance of the study room.

### 2018 - Museum Mediator.

UFES Museum of Life Sciences, Vitória, Brazil.

- Introduce the museum to visitors, control the flow of people, and pass safety guidelines.

## HONOURS AND AWARDS

---

### 2022 – 2024 - BRAFITEC scholarship.

CAPES Foundation, Brazil.

- Master's degree funding granted based on criteria of academic and technical excellence.

### 2016 - Honorable Mention Brazilian Public School Mathematics Olympiad.

Institute of Pure and Applied Mathematics (IMPA), Rio de Janeiro, Brazil.

- Stood out in mathematics at this Olympiad, being the only high school student out of around 500 in the school to receive this award.

### 2015 – 2016 - Outstanding certificate at the São João Batista School Science Fair.

EEEFM São João Batista (High School), Cariacica, Brazil.

- 2016 (1st place) - Physics project involving basic concepts of electromagnetism to wirelessly turn on lamps.
- 2015 (2nd place) - Tesla coil capable of creating electric arcs of a few centimeters.

## LANGUAGE SKILLS

---

- Portuguese - Native Language.
- English - C1, 2024. Cambridge Linguaskill B2 (178 out of 180), 2022.
- French - C1, 2024. Test de Connaissance du Français B2 (488 out of 699), 2021.
- Spanish - A2, 2024.
